47. Concept of personal insurance and its classification.
48. Accident insurance, its necessity, meaning and types. Mandatory types of accident insurance.
49. Life insurance, its necessity, meaning and types.
50. Necessity, essence and principles of reinsurance. Forms and methods of conducting reinsurance operations.
51. Incomes and expenses of the insurer, their composition and sources of formation.
52. Financial stability of the insurer and factors of its provision.
53. The concept and structure of the financial market. Functions of the financial market.
54. The state in the financial market. Self-regulation in the financial market.
55. Characteristics of the main subjects of the financial market and their classification.
56. Professional activity in the financial market.
57. Characteristics of financial market objects. Financial instruments.
58. The essence, structure and functions of the stock market.
59. Characteristics of the organized market. Stock Exchange.
60. The concept of issuer of securities. The technology of issuing securities.
61. Types and operations of financial intermediaries on the stock market.
62. Concept of securities and their classification. Operations with securities.
63. Derivative securities market. The nature and types of derivative securities.
64. The essence of the currency market. The role and functions of the foreign exchange market.
65. Infrastructure and financial technologies. Payment systems. Depository system.
66. Financial services. Financial services market.
67. Regulation of the financial services market. Digitization in the market of financial services. Financial inclusion.

### **3 STRUCTURE OF EXAMINATION TASKS**

Examination tickets (example - appendix A) are randomly generated.

The examination ticket consists of 50 test tasks prepared according to the program given in point 2. Each question has 3 answer options, among which only one is correct.

### **4 ANSWER ASSESSMENT CRITERIA**

#### **general requirements**

The commission evaluates the entrant's written answers to test tasks on a 100-200 point scale. Entrants who scored less than 100 points receive an "unsatisfactory" rating and are not allowed to further participate in the competitive selection. Entrants who scored 100 or more points are allowed to participate in the competitive selection.

To receive a positive grade from the entrance exam, the applicant needs to pass the minimum acceptable test threshold at the level of 0.3... or 30% of the total number of test points.

Test points are awarded for each correct answer to the task, 0 points are awarded for an incorrect answer. The received test scores for the entrance exam are converted into a 100-200 point scale (with rounding to the nearest whole, according to the rules of mathematical rounding) according to the following algorithm:

$$O = O_{\min} + k \cdot (N - r \cdot T), \text{ where}$$

- O – grade from the entrance exam on a scale of 100-200 points;  
 $O_{\min}$  – the minimum score from the entrance exam on a scale of 100-200 points, at which the entrant is allowed to participate in the competitive selection;  
 k – the coefficient of transfer of test points to a scale of 100-200 points, while:  
 $k = 100 / T \cdot (1 - r)$   
 r – the minimum acceptable test threshold with an accuracy of up to 0.01, which is set in the range from 0 to 1, but not less than 0.10;  
 T – the total number of test points that the entrant can receive during the entrance exam;  
 N – the number of test points that the entrant received during the entrance exam.

Provided that the number of test points that the entrant received during the entrance exam (N) is "0", then the entrant receives an "unsatisfactory" grade and is not allowed to further participate in the competitive selection.

### Calculation of test points

For each correct answer to a test question, 2 test points are awarded. Incorrect answer - 0 points.

The total number of test points (T) that an applicant can receive during the entrance exam is 100 test points.

The number of test points for the entrance exam (N) is calculated as the sum of test points excluding test points removed for corrections in the answer sheet (if provided by the program).

### Corrections Policy

For each correction, 1 test point is deducted from the total number of test points (T) that the applicant can get in the entrance exam.
